Thomson Reuters Eikon

Thomson Reuters Eikon is the new version of DataStream Professional. It contains a wide range of financial data such as equities, equity indices, bonds, bond indices, futures, warrants, options, fundamental company accounts data, etc.

ACCESS TO Thomson Reuters Eikon:

Thomson Reuters Eikon is available in a standalone workstation on the first floor of the University Library (click here to access the static map)

THOMSON REUTERS EIKON (main database)

Click on the Thomson Reuters Eikon icon to access the main database.

1. In the search box on top of the screen, you can enter a keyword or a code to search.
2. A list of relevant results is generated.
3. Pinpoint the entry you need to go to the full record.
The HSBC Holdings PLC’s information screen contains company information, and core metrics and price performance.

Click on different tabs to view the detailed information of each category

**Note:** No Real-time data for exchange traded instruments is available in our academic subscription. The delay time may be up to 15 minutes or several hours.

---

**THOMSON REUTERS EIKON EXCEL (Excel add-on)**

Click on the Excel Add-on icon to search historical data.

1. In the Thomson Reuters Eikon Excel Add-on, click **Thomson Reuters Datastream**;
2. Select **Time Series Request**;
3. The Time Series Request search box pops up, enter the code in the search box under **Series/List**;
4. If you need to check the code of the search term(s), click **Find Series** button. The **DFO Navigator** pops up and you can enter the search term to find the code (under the symbol column);
5. You can select datatypes, time range and display options if appropriate and click **Submit** button;
6. The data is exported to an Excel file.
